

**Heartland Metals** would like to thank you for inquiring about our metal building kits and products. We are striving to establish a reputation through satisfied customers and quality products. We produce both residential-type panel and high rib commercial type panels, as well as two profiles of standing seam roofing, from our roll-forming machines. We also stock a complete line of accessories that allow us to be your most complete metal building and component supplier in Central Iowa.

Custom Designed  
Pre-Engineered  
Steel I-Beam Building Kits

*From conception  
to  
completion*

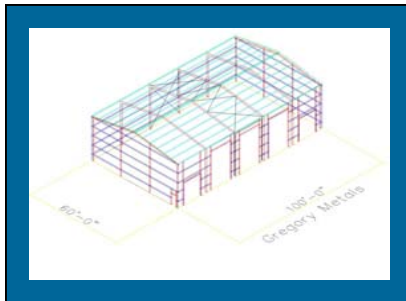

Heartland Metals uses a state of the art computerized pre-engineered cad system to produce the drawings for your building specifications.

Heartland Metals offers the highest quality pre-engineered steel I-beam building kit system at the lowest price available. Our steel buildings can be used in various customer applications, from simple garages to custom sized buildings covering thousands of square feet and any size in between.

All of the buildings manufactured at Heartland Metals are customized to the purchaser's request, but they all contain many crucial standard features. Heartland Metals Steel Buildings specifications feature rigid steel I-beam structure which will provide a solid, maximum strength structure, PBR/PB roofing and walls, #1 metal with a 45 Year Paint System Warranty.

We have the tools to design, detail, and draw your pre-engineered metal building.

As we enter the data, our computer program provides a drawing of the building shape and framing. This can be accomplished in a few minutes.

### Your Concrete

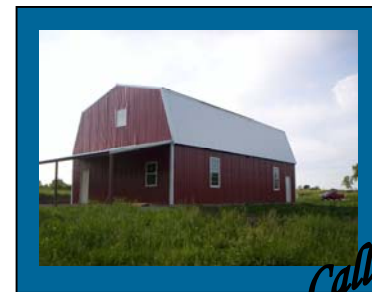

We will supply the concrete contractor of your choice with steel plates and the drawings for placement. The concrete must be square and level to ensure the building will seal properly.

### Insulation

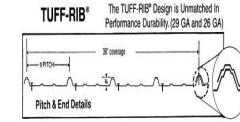

We offer Microfoil Insulation that will provide you with a R-19 value. Microfoil Insulation will also supply you with the vapor barrier needed to prevent condensation inside your building.

### Building Kit Options

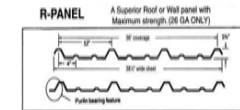

- Wainscoat
- Microfoil Insulation
- Vinyl Backed Insulation
- Vented Ridge
- Formed Ridge
- Garage Doors & Operators
- Overhangs & Soffits
- Commercial Gutter

## Panel Style and Color Selection

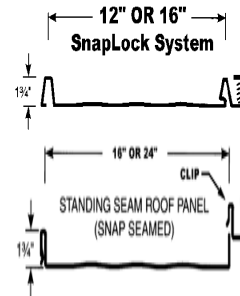

Ag-panel Is a Low Profile Residential-type Panel. Formed Out of Our 29 ga Metal.

High Rib Panel 2 6 ga Metal

We Offer Five Profiles of Standing Seam Roofing, Snap-lock and With Clips, All Offer No Exposed Fasteners When Complete.
